'S LEADING  
SPECIALISTS!

AUSTRALIA  
PIPE REPAIR S

# Blueline®

Designed to repair pipes under surfaces you don't want to destroy, Blueline solves most problems with sewerage or stormwater systems.

The most versatile lining system in the world, Blueline structurally repairs any type of blocked, damaged or leaking pipe in diameters from 40 to 1000mm with minimal disruption to your home or business.

Nuflow can clear blocked sewerage pipes and blocked stormwater pipes allowing drainage system to be flowing again in no time.

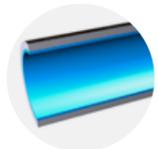

## Blueline process

Blocked or root intruded pipes are investigated and cleared with a high pressure jetter

A Blueline liner is pulled into place, inflated utilising a custom-made bladder and left to cure

Once the Blueline liner cures, the bladder is removed leaving behind a structural repair

# AUSTRALIA'S LEADING PIPE REPAIR SPECIALISTS

Blocked, damaged or leaking pipes can result in significant destruction, disruption and inconvenience.

Nuflow are your award winning pipe repair and unblocking specialists. Throughout Australia and New Zealand we provide a cost effective solution to sewerage, stormwater, potable water, fire system and pressure pipe repairs.

Utilising our Blueline and Redline technologies, we are able to repair leaking sewerage pipes, leaking stormwater pipes

Your **local** Accredited installer:

and leaking water pipes without having to excavate any surfaces resulting in minimal disruption.

Our mission is to be cutting edge and the leader in the non-invasive pipe rehabilitation industry. We have invested ten years Research and Development to improve the product range, services and capabilities we offer our customers.

From home owners to facility managers and engineers to property managers, Nuflow has a solution for you.

## COMPETITIVE ADVANTAGE

- ✓ We are the sole manufacturer of pipe rehabilitation products in Australia
- ✓ We have close to 40 accredited Licensees across Australia, New Zealand and Thailand
- ✓ Our Director/Owner has over 34 years' experience in the plumbing and pipeline industry
- ✓ Our investment in Research & Development constantly keeps us ahead of competitors
- ✓ Environment & Sustainability Award winner, Gold Coast Business Excellence Awards
- ✓ Sustainability and longevity of our products, with a manufacturing warranty of 50 years
- ✓ Nuflow specialise in sectional lining, our product can stop and start at any point within the pipe
- ✓ We can repair junctions in one complete process, strengthening the complete junction
- ✓ Nuflow's seamless liner restores structural integrity and prevents joint weakening
- ✓ Nuflow's product can be installed on junctions, bends, horizontal or vertical pipes all in one application.

## OUR CREDENTIALS

Our products are Australia/New Zealand 4020:2005 approved, we are members of the Australian Society for Trenchless Technology and Licensed under the Queensland Building and Construction Commission. In addition:

-  Nuflow Technologies is proudly an **Australian owned and operated** company
-  Certification to **AS/NZ 9001:2008** Quality Management Systems
-  We are **Bronze GreenBizCheck** certified
-  Industry - Accomodation - Managers, **Preferred Supplier**

# Redline

Redline is a simple but highly effective cured-in-place pipe restoration system that completely coats the inside of your copper or galvanized pipe.

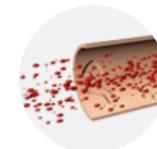

Certified safe for drinking water, Redline is most commonly utilised to coat water systems. Redline has many other applications including, fire suppression systems, chiller and heating lines.

The process prevents future leaks and corrosion while it protects you from lead and other contaminates leached from your piping into your water.

## Redline process

Corroded pressure pipes are blasted with garnet to prepare them for the rehabilitation process

Shots of Redline are moved through the entire pipe system using high pressure air

The end result is a Redline barrier between the pipe and the product in the pipe
